Core Gameplay Loop
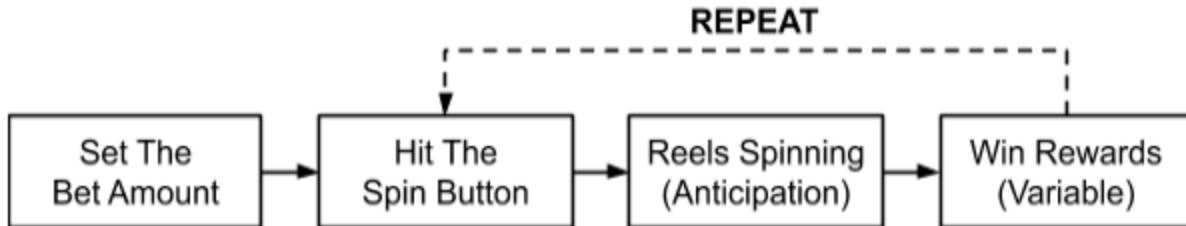

Gameplay Mechanics

Slots of the wild is a 5x4 slot machine game the theme is inspired the movie Jurassic park

● Game Background will have a battleground with animals in the park

● Whenever you win there is a feedback and the sound of animal you're creating in the background

● The bonus phase with the sound of the coins being dropped

Mock Screenshot of the game

FTUE - First-Time User Experience

After the initial cut screen has been played, DNA Man shows up and explains to the user about the different symbols and Pay Lines of the game and their values. Next, he explains the user about the special symbols that trigger special events for more significant rewards. Lastly, he tells the user to set a bet amount and hit the spin button to play and win. This FTUE is only shown to a new player and is skippable by all players. The symbols and pay line information can always be accessed from the Pay Table button.

Paylines

These are the primary pay lines that will be used by the game to calculate the winning combination. Currently, there are 20 pay lines. These can be altered or removed, or additional new pay lines can be added if required.
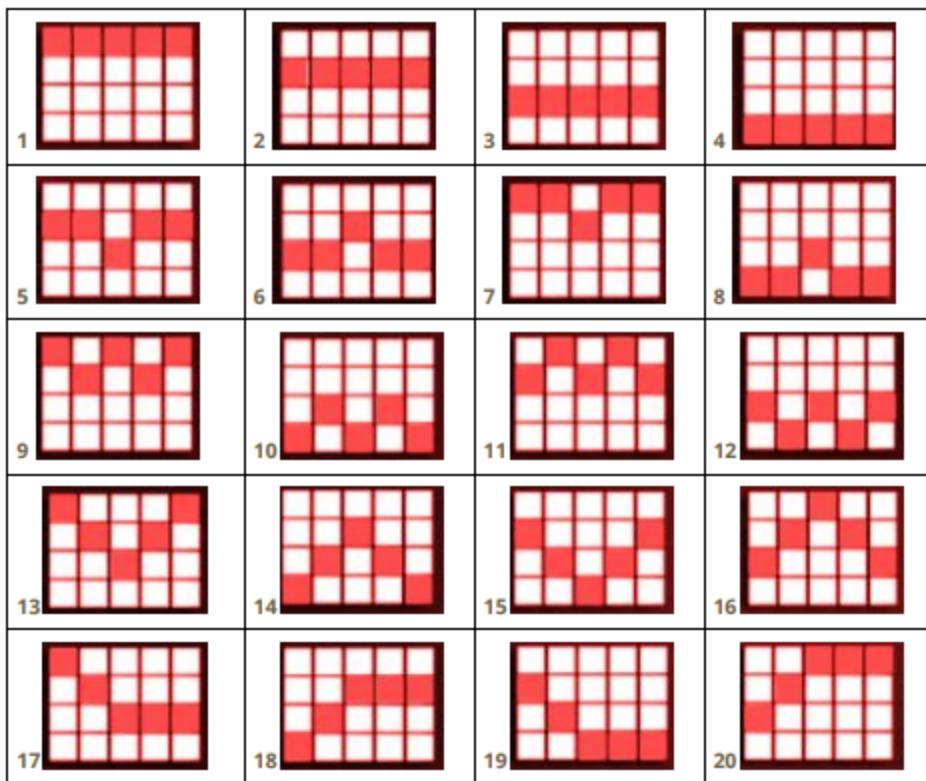

Symbols - Visual Reference and Values

Standard Win Symbols

Very Rare DNA Strand	Rare DNA Strand	Rare DNA Strand
Very Rare DNA Strand	Uncommon DNA Strand	Uncommon DNA Strand

Special Symbols

DNA Man	DNA Potion	Cell
DNA Tree		

Standard Win Symbols

King	Queen	Jack
3 = 5x	3 = 5x	3 = 5x
4 = 25x	4 = 20x	4 = 20x
5 = 100x	5 = 75x	5 = 75x

Ace	Nine	Ten
3 = 5x	3 = 5x	3 = 5x
4 = 25x	4 = 15x	4 = 15x
5 = 100x	5 = 20x	5 = 20x

Standard Win Symbols

A player wins a reward when 3 or more of the same symbol on any of the pay lines.

Reward / Payout Calculation

Formula:

Total Bet Amount	*	Number of Active Pay Lines	*	Symbol Value =	Total Payout / Win Amount
(Set by player)		Total number of pay Lines			

Example 1:

Total Bet = 10,000

Total paylines = 50

Symbol value = 30

Active paylines = 2

= 10,000 x 2/50 x 30

= 1000 x 2 x 6

= 12,000 Tokens

$$10,000 * \frac{2}{50} * 30 = 12,000 \text{ Tokens} = \boxed{\text{Win Amount / Payout Amount}}$$

Example 2:

Total Bet = 25,000 Total paylines = 20 Symbol value = 100 Active paylines = 1

= 25,000 x 1/20 x 100

= 2500 x 1 x 50

= 125,000 Tokens

$$25,000 * \frac{1}{20} * 100 = 125,000 \text{ Tokens} = \boxed{\text{Win Amount / Payout Amount}}$$

Standard DNA Symbols

A player unlocks a DNA Strand when 3 or more of the same symbol appear on any of the pay lines. They should match up with the same rarity of the DNA

Special Symbols Description
